NO SOOT ! NO CLINKER ! NO GAS ! NO NUISANCE !

THE GREENE Soft Coal Cooking Stove!

This New Stove consumes all varieties of Bituminous Coal without forming Clinkers, Making Soot, Creating Gas or Nuisance of any kind, and is especially adapted to burn Slack Coal or Culm, Wood, Corn or Corncobs perfectly. It is a good COOKER, BAKER and BROILER; quick in operation, and possesses the merit of GREAT ECONOMY. In fact, it is Perfection in the way of a Cooking Stove. It is easily cared for—the grate is never dumped, no ashes to sift or clinkers to remove, is cleanly in its operation and is of GREAT DURABILITY. The annexed testimonial is one of the many received.

From H. S. Chamberlain, Esq., President of the Roane Iron Company.

CHATTANOOGA, Tenn., Jan'y 11, 1880,

Gentlemen:

Hearing the Greene Stove highly spoken of as being very economical in fuel, and satisfactory for family use, I, some months since, procured a No. 9 cooking stove of this pattern, and after thorough trial find it even better than I had expected. I have tested it carefully with all sorts of coal found in this section, including the Tennessee, Dado, Soddy, Knoxville, Daisy, and Rockwood, and find that any of these can be burned, either fine or coarse, without clinker and with very great satisfaction. The stove is emphatically a smoke consumer, in which all gases usually wasted up the chimney are utilized, and in point of economy I am within the mark when I say the amount of coal consumed for ordinary cooking and other kitchen purposes is less by one-half than in any other stove with which I am acquainted in the market. Its cooking qualities are supremely excellent. It is the only soft coal burner known to me which can be used pleasantly and economically in the kitchen, and being quickly heated and as free from dust and dirt as a wood stove, must, as soon as its merits are known, take the place of all other varieties. I am very glad to say this much for your stove, as it is gratifying to see an effort to apply valuable scientific principles in household economics meet with such merited success.

I am very truly yours,

H. S. CHAMBERLAIN.

This Stove meets a want, long felt, in those regions where Bituminous Coal is the prevailing fuel. As this important invention, covering the Eastern and Western Continents, is the property of a Newark Company, Citizens having friends in the Bituminous Coal burning regions are invited to apply to the Company for Circulars and Testimonials, and thus extend the knowledge of this NEWARK INDUSTRY.

HOLBROOK

PREFACE.

The population of Newark has greatly increased—according to the last census, 136,400 (see p 1040d). Business is looming up, the veil of depression is lifted, and our city is once again on the road to prosperity. Newark, with its area of eighteen square miles, and nearly three miles of river front, its extensive railroads, its proximity to New York, its unequalled facilities for manufacturing, attracts the attention of capital, and it affords us pleasure annually to record new enterprises springing up in our midst.

The STREET GUIDE of Newark and Harrison (p 25) is the key to the work. The DIRECTORY OF NAMES embraces the individual names, with occupation and residence; those in business, place of business and residence; the COPARTNERSHIPS, with individual names comprising the firms; the various CORPORATIONS and other interests. The BUSINESS DIRECTORY (p 1041) is a classified list of the various branches of business. The APPENDIX OF INFORMATION (p 929), of 115 pages, embraces the City, State, and Federal institutions, the Census of United States and New Jersey, Election data, Railroads, piers, etc., of New York, and other interesting matter. The DIRECTORY OF ADVERTISERS, each advertisement paged and referred to throughout the work, is indexed (pp. 6, 15, 18.) The TABLE OF CONTENTS will be found on page 4. The index to BUSINESS DIRECTORY, page 18. A MAP OF NEWARK, corrected especially for this work up to the present time, is gratuitously inserted in each copy.

To preserve uniformity, at the commencement of the publication of this work, the present size was adopted. The matter *increases each year*, but is more condensed in form, and subscribers thus *annually receive a larger amount of matter*.

In the compilation of names, the importance of recording every citizen of suitable age, with full and reliable information relative thereto, is kept uppermost in mind. Each name is made the subject of special inquiry, and every effort is exercised to render the work valuable for future reference. We again refer to the *difference in dates of moving*, which is a great source of trouble and expense. Many vacant houses are not occupied until May 1st, *after our canvass is made*, while many arrive in the city and others change, after the work is in print. A list of removals and corrections, too late for classification, will be found at the end of names (p 928d.) The dread of taxation, jury duty, creditors, and *other uncertainties*, lead many to shun the Directory. The Directory, however, is expected to make amends for all shortcomings. In some boarding houses, a Directory is taken for reference, and unless sufficient evidence is adduced of the arrival in the city after the work is published, application for board is in vain. The *co-operation of citizens* is invited, and we will be glad to learn of anything tending to the reliability of the work.

HOLBROOK'S MAP OF NEWARK, similar to that accompanying this work, may be found at the book stores, or at the DIRECTORY OFFICE, No. 11 Mechanic Street.

Provident Savings Life Assurance Society

OF NEW YORK.

BRANCH OFFICE, 721 BROAD STREET, NEWARK.
HOME OFFICE, WESTERN UNION BUILDING, CORNER OF
BROADWAY AND DEY STREET, NEW YORK.

CASH CAPITAL,	-	\$100,000.00
Surplus to Policy Holders,		106,226.45

This Society makes a specialty of the yearly renewable life policy, which was originated by SHEPPARD HOMANS, ESQ., (for many years the Actuary of the Mutual Life Insurance Co., of New York.)

By insuring under this plan the insured "Pays as he goes—Gets what he buys—and stops or continues as he chooses."

These policies are simple, safe and just to all. They extend over the whole life. They provide the protection of life insurance as long as it is needed, at actual cost. Like fire insurance policies, the premiums provide for the risk of the current year alone.

They call for less outlay for a long series of years than any others. The policy-holder never has at risk more than the actual cost of one year's insurance.

By these policies all the dangers and defects of the old plans are avoided, and life insurance is made acceptable by its simplicity, safety and economy.

The Society also issues premium uniform policies, for amounts from \$250 and upwards, on which the premiums may be paid in monthly installments.

SHEPPARD HOMANS, President and Actuary.

ELECTION OF PRESIDENT AND VICE PRESIDENT OF THE UNITED STATES.

ELECTORAL COLLEGE.

"The voters elect in the several States as many persons as there are members of Congress, known as Electors. These Electors meet at the State Capitols upon a fixed day, and cast the electoral vote of the State for President and Vice President. Copies of this vote are sent by messenger to the United States Secretary of State and to the President of the United States Senate, and opened and counted at a joint meeting of both Houses of Congress, in February following the election. The persons receiving the majority of the electoral votes for the two offices are declared duly elected President and Vice President of the United States for four years from the ensuing 4th of March. In case no party has a majority of the electoral vote, the election is made by the House of Representatives alone, each State casting one vote (which is controlled by a majority of the Electors) and a majority of all the States is necessary to a choice."

No Senator or Representative, or persons holding an office of trust or profit under the United States, is eligible for an Elector.

United States Treasury notes or National Bank notes only received or paid.

Post Money Orders, for sums not exceeding \$50, each order can be obtained at the principal post offices throughout the country. The use of these orders, by persons who desire to make remittances by mail, is far preferable to sending money, even when the letter containing it is registered. By the money order system, *absolute security* against loss is obtained. Money orders are good for one year from the date of issue. In case of their loss, no charge is made for the issue of duplicates. Persons sending money orders should be careful never to send them in a letter which contains the name of the person from whom they are sent. This is necessary in order to guard against loss in case the letter should fall into improper hands; money orders *never* being paid to any person who cannot tell the name of the party to whom they were issued.

As letters are frequently dropped in the letter-boxes insufficiently paid, persons who are not certain in regard to weight, rates, etc., would do well to inquire of the Stamp Clerk before mailing them. If sent to the Dead Letter Office they are delayed two or three mails.

The object of this institution is to reform boys and girls committed by the Police Justice for truancy and such conduct which indicates they are beyond the control of parents. It is a public reformatory, supported by the city, taking children viciously inclined and inuring them to habits which tend to lives of usefulness. The Home is in no sense like a prison, but the intent is to make what its name implies, a "home" for wayward children.

1. On the breaking out of a fire, notice should be immediately communicated to the nearest alarm box, keys of which are always in the hands of the police and responsible persons in the vicinity of boxes.

2. Key holders, upon the discovery or positive information of a fire, will unlock the box, pull down the slide or hook once, *and let go quick*. This gives the desired alarm all over the city, repeating itself four times.

3. Never signal for a fire seen at a distance; never touch the hook except to give the alarm of fire; be sure the box is locked before leaving it; give an alarm for no cause other than an actual fire; *do not give an alarm for a chimney*.

4. Owners and occupants of buildings are requested to inform themselves of the location of signal boxes near their property; also where the keys are kept. Be sure the alarm is properly given; one signal stroke of the house gong is not given for an alarm of fire.

5. Second alarms for the same fire can only be given by the Chief Engineer or one of his assistants.

6. Alarms will be sounded on the alarm bells thus: For box Thirty-two, three strokes—1—1—1, and a pause, then two strokes—1—1, a longer pause and repeating. Alarms for other numbers are given in like manner.

7. If a second alarm is to be sent out, it will be preceded by 3 blows upon the telegraph, a pause of 20 seconds, then the box will be pulled—the Bell Ringer will strike 12 blows upon the fire bell in quick succession, a pause of 30 seconds, then strike the box.

8. After the first or second alarm has been sent out and extra engines are wanted, their number will be called once, and the Bell Ringer will strike the number of the engine that is wanted 3 times on the fire bell.

9. If a hose tender is wanted without the engine, the number of the company to which said tender is attached will be called twice.

10. If a third alarm is to be sent out, it will be same as the second, with the exception that the Bell Ringer will strike a general alarm upon the fire bell.
